To Whom It May Concern

Re: George Manuel

It has been my pleasure over the past year to have been able to work with George during his internship here at Ontario Power Generation Darlington Nuclear. During his internship, George was assigned to be the SCR (Station Condition Report) Coordinator for Station Work Control (among other duties). This role is very intense dealing with all kinds of issues that arise from the station. This requires knowledge of all the different processes and the roles and responsibilities of other departments in order to deal with the issues in the best interest of the Station. George learned all of this in a very short period of time. If he was unsure of anything he never hesitated to ask the right questions in order to make the correct decision. He has excellent interpersonal skills and feedback from others was always very positive in their dealings with George. He has earned a lot of respect from other colleagues from his dealings with them and especially my respect. I honestly cannot say enough great things about George and how much he has impressed myself and others. I know without a doubt in my mind that George would be an excellent asset to any company that hires him.

If you wish to contact me for more additional information regarding George, please feel free to do so.

Best regards
